

THE ODOR TERMINATOR

Eliminate Odors Electronically

With the

FlozoneAir FLO1200

The FLO1200 is a compact and a quick solution to kill odors like:

- Baby Odors
- Water Damage and Mildew Odors
- Pet Hair, Body and Urine Odors
- Paint, Glue & Chemical Odors
- Spilled Beverage Odors
- Gasoline and Oil Smells
- Old Car Smell
- Airborne Mold
- Viruses
- Cigar and Cigarette Smoke Smells

HOW FLOZONEAIR UNITS WORK

The FlozoneAir's FLO600 eliminates odors by producing programmable levels of ozone. The Ozone It created electronically by converting Oxygen (O₂) into Ozone (O₃). By its very nature Ozone will revert to Oxygen (O₂) within a short period of time. It is this process of returning the Oxygen (O₂) that creates the deodorizing effect. The O₃ Oxygen atom in Ozone (O₃) is unstable so it must attach its self to another odorous element. It is such gaseous elements that are the source of everything we smell. In combining with the 3rd atom the odorous element is oxidized and the odors are eliminated.
